

STUDENTSFIRSTNY ANALYSIS:

MAYOR DE BLASIO'S SCHOOLS PERPETUATE INEQUALITY

AUGUST 2015

Results from the 2015 3rd-8th grade New York State ELA and math tests confirm that little progress has been made during Mayor de Blasio's first full year in control of New York City's schools. Students citywide saw an increase in proficiency of just two percentage points on the state English exams and one percentage point in math, meaning that the same proportion – roughly two-thirds – of the city's children remain off-track. Worse, no improvement was seen in the number of students scoring in the Level 1 range – well below proficient in standards for their grade – in both ELA and math. The number of failing schools remains high and the Mayor's Renewal and Community Schools interventions have done little to reverse trends; a shocking 9 out of 10 students in these schools are not being effectively taught to read and do math. The lowest performing schools are in the communities that need quality the most. NYC public schools perpetuate inequality and deny low-income students the opportunity they deserve. Mayor de Blasio has rejected evidence of what works, instead favoring initiatives that don't rock the boat. The following analysis shows conclusively: radical change is needed.

Students Remain Off-Track

Too Many Failing Schools

The lack of progress, while disappointing, is not at all unexpected given Mayor de Blasio's Inadequate Education Agenda. It is no surprise that the Mayor's ill-conceived school quality policies for the 2014-15 school year have played out in the form of lackluster test scores for New York City's students. Despite rhetoric to the contrary – including the mystifying proclamation that the test results reflected "a very good day for New York City" – there are too many failing schools citywide.

A whopping **570 out of 1,283 schools** in New York City with students in grades 3-8 had failure rates of 75% or higher for math this year, meaning that a large majority of their students are performing below grade level. The number of failing schools is even higher when looking at ELA proficiency. **Ninety-four schools across the city saw at least one grade in which not a single student passed the New York State ELA or math exam in 2015 (see Appendix A). Of these, 48 logged at least one zero-pass grade in 2014 as well. Further, dozens of schools had substantial declines in math and ELA proficiency from 2014 (Appendix B). This is not what progress looks like.**

Ineffective School Turnaround Policies

Especially concerning are the dismal results from Mayor de Blasio's flagship school turnaround programs: Renewal Schools and Community Schools. While lower average scores should be expected for schools in these programs, their low performance on the 2015 state exams is shocking. Every school included in the Renewal program – which is entering year two out of three next month – had failure rates of 75% or more school-wide in both ELA and math. **That's more than three-quarters of all students reading and doing math below grade level in the schools getting the most attention from the administration.** Further, many Renewal Schools posted a significant decline in proficiency rates over 2014 levels. Similar patterns were seen for schools included in the Community Schools program, which overlaps heavily with the Renewal program. A shocking 9 out of 10 students in these schools are not being effectively taught to read and do math. Elevating struggling schools to the level of quality New York City's students deserve will require far more than the incremental gains sought by the current administration. From the 2015 test scores, it's clear that Mayor de Blasio's school turnaround policies are not enough.

Uneven Distribution of Failing Schools

The lowest-performing schools – those with a 75% or greater failure rate in ELA or math – are concentrated in the needlest communities within New York City, the South Bronx and eastern part of Brooklyn. Students in these districts qualify for free or reduced price lunches and Human Resources Administration (HRA) benefits at high rates. Parents in these poorperforming districts send their children to school with the hope that they will get the best education possible. In reality, the state test results show that for many of these parents, there are few good schools to rely on.

* Schools with more than 75% of students failing to meet proficiency standards on the 2015 New York State 3-8 ELA assessments

 * Schools with more than 75% of students failing to meet proficiency standards on the 2015 New York State 3-8 math assessments

Lack of Transparency

The state of schools in New York City is made worse by a deliberate lack of transparency around educational quality. Soon after taking office, de Blasio jettisoned the School Progress Reports - with easy-to-understand A-F grades – replacing them with the more qualitative and harder-to-interpret School Quality Reports. In addition to being more difficult to understand, the

new School Quality Report ratings are lenient to the point of being meaningless. Citywide, over 75% of elementary and middle schools with a recent Quality Review rating were deemed "Proficient" or "Well Developed" in 2014 – despite low pass rates on state tests. Dozens of schools that appear to be of high quality based on the 2014 School Quality Reports have astronomical rates of failure on ELA and math state exams (see Appendix C and D). Not only do parents have few high-quality schools to choose from, it is increasingly difficult for them to have objective measures of school quality.

Conclusion

The new state test score results point to significant gaps in school quality across New York City that cannot be addressed without major systemic reforms. Sadly, Mayor de Blasio continues to fail our students by ignoring key policies – such as teacher quality and school choice – that have the potential to elevate the quality of schools for all of New York City's students. As long as the educational leaders of our city continue to cater to the interests of everyone except those who truly matter – NYC parents and students – we should not expect anything to change.
